

Job Description: Network Engineer

Purpose: Responsible for planning, organizing, and implementing major LAN/WAN Information Technology projects for large enterprise clients.

Major Tasks, Responsibilities & Key Accountabilities:

- Responsible for supporting all aspects of large scale information technology projects.
- Work as part of a team in technical, services, and project support areas to meet identified goals and objectives.
- Design, implement and maintain sophisticated information technology projects and complex IT infrastructure projects.
- Utilize strong technical skills for effective troubleshooting and problem solving.
- Communicate effectively with clients and staff at all levels.
- Other duties and responsibilities as assigned.

Knowledge, Skills, Abilities and Competencies:

- Familiar with Remedy and LANdesk, IT consulting services and practices, LAN/WAN design experience, wire/cable projects, facilities planning and working with large complex accounts requiring creative technical IT solutions.
- In-depth understanding of technology-based products and consulting services
- Working knowledge of K-12 education and/or experience in successfully delivering projects into the public sector.
- Ability to communicate and establish relationships with enterprise clients, as well as many levels within the education district, community and within the company.

Certifications Required:

- Candidate must have one or more of the following certifications or equivalent: CCNA, Network+, CWNA plus one or more advanced certifications as determined by management.

Education:

- AS degree in Computer Science or related field, or equivalent technical experience/training.

Experience:

- At least three years of Desktop, Server and Database related technical experience.
- Wireless, VoIP, security and large-scale networking experience.

Preferred Qualifications:

- Good communications skills, self-starter and ability to work independently.
- Possess and apply a broad and comprehensive knowledge of a particular field of specialization to the completion of difficult and complex assignments.

Additional Requirements:

- Candidate must pass background check required to obtain security clearance level required for K-12 environment access.
- Valid driver license required.
